*Hay información disponible en Español*

\*Diesel vehicles with a GVWR more than 14,000 pounds that are owned by private or federal government fleets are subject to the Truck & Bus Regulation.

## **Upcoming Truck & Bus Regulation Compliance Deadlines**

### **Lighter Trucks and Buses (14,001 lbs - 26,000 lbs GVWR)**

- Cannot operate vehicles with 1996 engines, unless you qualify and report for flexibility options by January 31, 2016.\*

### **Heavier Trucks and Buses (26,001 lbs GVWR and greater)**

- Cannot operate vehicles with 1994-95 engines, unless you qualify and report for flexibility options by January 31, 2016.\*

Replacements with a 2010 model year or newer engine meet the final requirements, but owners can also replace with used trucks that have a future compliance date on the schedule. However, by 2023 all engines must be replaced with a 2010 model year or newer engine, with few exceptions.

\* Vehicles with older engines must already be in compliance.

Visit [arb.ca.gov/truckstop](http://arb.ca.gov/truckstop) to view the complete schedules.
